

Nature-Based Design Forum

Nature-based design has increasingly proven to be an effective contributor to coastal storm risk management. This workshop is ideal for practitioners, engineers, landscape architects, locality representatives including stormwater officials, resilience officers, planners, consultants and more. Come learn about nature-based design implementation outside Virginia and help identify gaps in knowledge to bridge science and practice through collaboration.

Tuesday, May 7, 2024

8:30 AM - 4:30 PM

Old Dominion University

address provided with registration

Register by April 8 at the Q/R code above.

First come, first serve--limited seating

Agenda will be available through the registration link

Sponsored by ODU Institute for Coastal Adaptation & Resilience (ODU-ICAR), a national center that advances the resilience of coastal communities by integrating scientific and engineering knowledge with human dimensions to develop innovative solutions, in partnership with Chesapeake Bay Foundation.
